Letter of Reference Raptor Protection Methods of Instruction Course

To whom it may concern

As the President of the Canadian Police Canine Association, I contracted Raptor Protection to deliver a one-week methods of instruction course to numerous police agencies who were in attendance.

This training was easily coordinated with Raptor Protection and was highly regarded by all in attendance. Several agencies that had members attend then coordinated the same training course be delivered at their own agency location.

I know that for the Ontario Provincial Police Canine program, we had adapted much of our canine handler instruction based on the information and content of the MOI course. I believe it is a fantastic encapsulation of the salient and most relevant instruction methods currently available.

Please feel free to contact me directly if you require further reference.
